# CCCB President and Chair of the Organizing Committee Message

It is my pleasure to welcome you all on behalf of the Organizing Committee to the Crohn's and Colitis Conference, in its first edition, in the lovely Kingdom of Bahrain. Inflammatory Bowel Disease has become an area of growing interest over the past few years and multiple international organisations have dedicated time and research to combat this disease entity. Our region has experienced an astounding disease surge highlighting the importance of improving the understanding of Crohn's and colitis and management of these diseases.

Our conference is intended to discuss and share the latest cutting the edge advances in both diagnosis and management of inflammatory bowel disease under the theme 'Collaborate to Heal' where we will emphasis the necessity and efficacy of a multidisciplinary approach to provide patients with the best standard of care available out there.

We hope that this meeting will provide you with that extra yard where you can discuss and share the most recent research and recommendations in the field of IBD with our reputable and internationally renowned faculty members.

I am thrilled to welcome you to the pearl of the Arabian Gulf, the beautiful Kingdom of Bahrain, where culture and hospitality tango in a mesmerising recipe to guarantee you an unforgettable experience and memorable stay.

## **Dr. Fatema Al Alawi**

CCCB President and Chair of the Organizing Committee

Prof. of Translational Medicine, University of  
Birmingham  
Consultant Gastroenterologist, University  
Hospital, Birmingham, UK

# Crohn's Colitis Conference B A H R A I N

## Why CCCB is Valuable?

The Crohn's & Colitis Conference Bahrain (CCCB 2019) is an energetic scientific event intended to create awareness, provide practical tips and new updates, and share exciting developments in the clinical management of Crohn's Disease and Ulcerative Colitis. CCCB 2019 will be held in the Kingdom of Bahrain on 19th and 20th April 2019 at Bahrain Conference Centre, Crowne Plaza Hotel.

Inflammatory Bowel Disease (IBD) is considered a growing global problem. There has been a remarkable globalisation of IBD over the past two decades, with a striking increase in incidence of especially Crohn's Disease. The rising prevalence and incidence of IBD has been recently confirmed in global systematic reviews.

Scientific advances and intense research have led to the development of many new biological therapies to control Crohn's Disease and Ulcerative Colitis. These therapies are shown to be effective for inducing remission, preventing complications, improving quality of life, and reducing hospitalisation and debilitating surgeries.

The CCCB 2019 is an ideal opportunity for connecting health planners, decision makers, gastroenterologists, surgeons, internists, clinicians, microbiologists, radiologists, clinical pharmacists, and other health care professionals in a friendly atmosphere for exchanging scientific advances in the diagnosis and management of inflammatory bowel diseases.

The CCCB 2019 is an exciting educational activity led by recognised experts in the field of IBD that cannot be missed. The scientific programme provides a multi-disciplinary approach to the assessment, diagnosis and treatment strategies of IBD management presented by top-notch international, regional and local experts who will show the most recent data and give their valuable opinion on how to improve local practice. The interactive and discussion-based format of the conference will encourage audience participation through dynamic lectures, case-based studies, and hands-on workshops.
